Westwood Public School

Task Set: The Water Cycle — Grade 5 Science • Room: WATER-42 • When: May 07, 2026, 11:26 a.m. — May 07, 2026, 12:11 p.m.
Perspective: Science, Grade 5

Brief Overview

Students demonstrated strong collaborative engagement with the water cycle content. Most teams correctly identified the key stages of evaporation, condensation, precipitation, and collection. The teach-back and drawing activities generated the richest discussions, with students using scientific vocabulary naturally. Two teams showed exceptional understanding of transpiration, going beyond the core curriculum. The sorting activity effectively revealed common misconceptions about the difference between evaporation and boiling.

Engagement: High (87%) • Overall proficiency: Proficient (78%)

Class Chat Blurb (copy & paste)

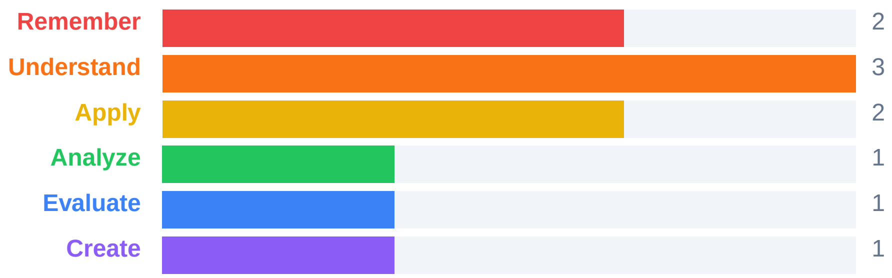
Today in Grade 5 Science, students explored the water cycle through 10 interactive stations including drawing, sorting, brainstorming, and teaching each other! They worked in teams of 3 to master concepts like evaporation, condensation, and precipitation. Engagement was high and the class averaged 78% overall. Ask your child which stage of the water cycle they found most surprising!

Skills Developed

- Scientific vocabulary
- Sequencing
- Visual communication
- Collaborative reasoning
- Peer teaching
- Critical thinking

Cognitive Profile — Bloom's Taxonomy

10 of 10 tasks mapped • Highest: Create • Dominant: Understand



The task set provided a well-balanced cognitive experience. Lower-order tasks (vocabulary recall, true/false) built foundational knowledge, while higher-order tasks (teach-back, brainstorm battle) pushed students to synthesize and evaluate. The draw task bridged understanding and creation effectively.

6 of 10 tasks target higher-order thinking (Apply and above). The mix of recall, application, and creation tasks provides a well-rounded cognitive experience appropriate for Grade 5.

Task Set: The Water Cycle — Grade 5 Science • Room: WATER-42 • When: May 07, 2026, 11:26 a.m. — May 07, 2026, 12:11 p.m.
Perspective: Science, Grade 5

Standards Alignment

[ON-SCI-5.2] Understanding Earth and Space Systems: Water and the Environment

Students explored the continuous cycling of water through evaporation, condensation, precipitation, and collection.

[ON-SCI-5.3] Investigating the Water Cycle

Teams investigated how water moves through different states and environments using hands-on sorting and sequencing activities.

Concepts Covered

- Evaporation
- Condensation
- Precipitation
- Collection
- Transpiration
- Water vapour
- Cloud formation
- Groundwater
- Runoff
- The hydrological cycle

Activities Completed

- Water Cycle Vocabulary (10 pts)
- Evaporation vs Condensation (10 pts)
- Cloud Formation Riddle (8 pts)
- Draw the Water Cycle (12 pts)
- Water Cycle Sequence (10 pts)
- Precipitation True or False (8 pts)
- Transpiration Brainstorm (10 pts)
- Water Cycle Teach-Back (12 pts)
- Groundwater Fill-in-the-Blank (10 pts)
- Team Water Cycle Photo (10 pts)

Assessment Categories

- Knowledge & Understanding
- Thinking & Inquiry
- Communication
- Application

Note to Parents

Today in 5A — Ms. Thompson (Grade 5), we completed a Curriculate activity wherein students were actively involved in exploring/reviewing Evaporation, Condensation, Precipitation. They completed activities such as Water Cycle Vocabulary (10 pts), Evaporation vs Condensation (10 pts), Cloud Formation Riddle (8 pts). The level of engagement was High (87%). Overall, students achieved Proficient (78%).

Student Session Report

Ava M.

Team: Water Warriors

Engagement: 71% • Overall mark: 84%

Category Breakdown

• Knowledge & Understanding: 88% — Solid grasp of key vocabulary.
• Thinking & Inquiry: 60% — Good problem-solving in sequencing tasks.
• Communication: 89% — Contributed well during teach-back.
• Application: 94% — Connected concepts to real-world examples.

Teacher Comment

Ava M. participated actively throughout the session, demonstrating strong understanding of the water cycle stages. Showed leadership during the brainstorm activity.
